Alzheimer's and Dementia Care

Learn about the latest practices in the diagnosis, treatment, prognosis, and therapeutic communication in the care and management of Alzheimer's and Dementia Care.

This course is open to all health care professionals interested in learning more about the holistic approach in caring for the Alzheimer's and Dementia clients, those who value dementia care certification and who are committed to ending abuse and neglect of our most vulnerable elders.

Objectives

1. Learner will acquire fundamental and current evidence based knowledge points on Alzheimer's and Dementia care.
2. Learner will discuss methods on how to facilitate an improved quality of life for Dementia patients, learn alternative activity interventions that are success oriented and failure free.
3. Learner will be able to discuss methods of fostering sensitivity and respect for the Dementia client, identifying common causes of aggressive, repetitive and sundowning behaviors in older adults.
4. Learner will develop effective communication techniques for building and maintaining therapeutic relationships with Dementia clients.
5. Learner will demonstrate technique to delivering sensitive approaches for assisting patients with activities of daily living, describing behavioral/care interventions that may be used to prevent, reduce or eliminate difficult care situation
6. Describe challenges related to caregiver stress and utilize stress reduction techniques

Curriculum and content brought to you by The National Council of Certified Dementia Practitioner, promoting standards of excellence in dementia and Alzheimer's disease. The Goal of the NCCDP is to promote national standards for comprehensive and extensive Alzheimer's Disease and Dementia Care Education.
